01 Install 67 Cleaner

67 Cleaner runs on Intel and Apple silicon Macs with macOS Ventura 13 or later. To check your version, choose **Apple menu → About This Mac**.

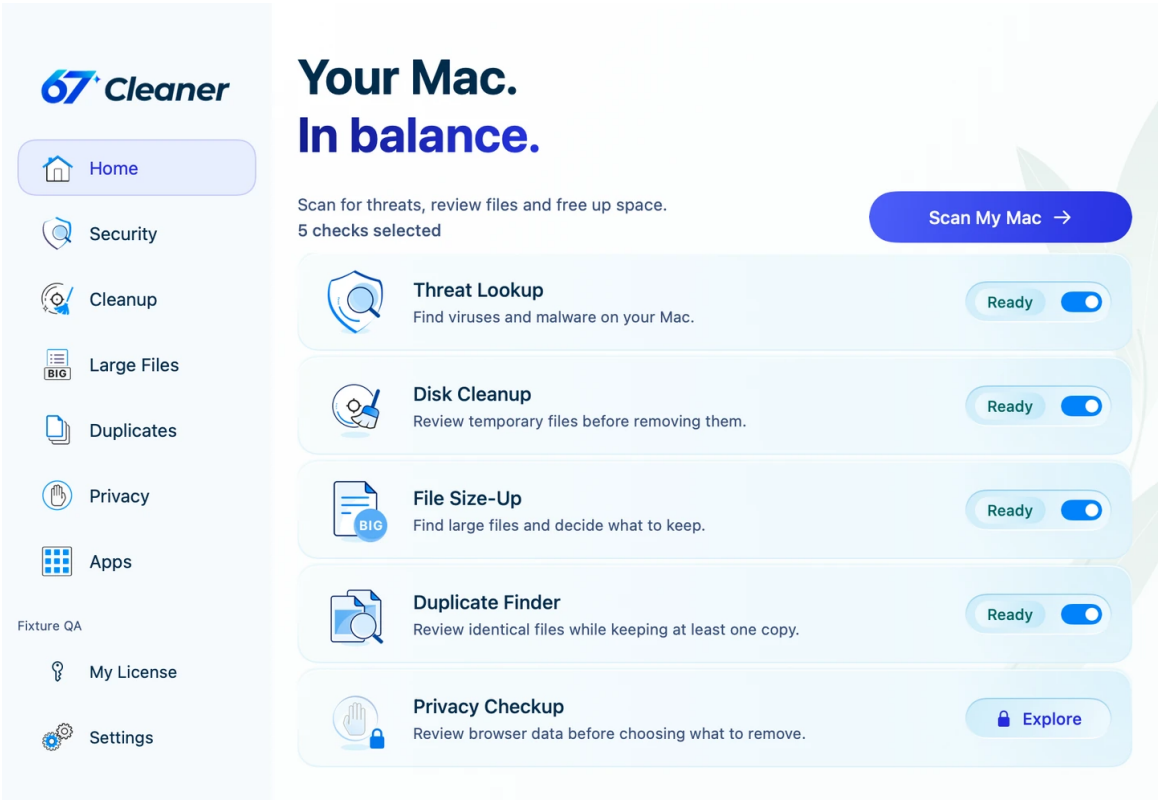

01 Install 67 Cleaner

1. Open the official 67 Cleaner website and select **Download for Mac**.
2. Open the downloaded disk image in Finder, then open the installer package inside it.

3. Follow the macOS Installer prompts. If you are replacing an older copy, quit 67 Cleaner before running the installer. On a managed Mac, ask your administrator if you need installation permission.
4. Open **67 Cleaner** from **Applications**. Keep your Mac online so the app can check for current threat definitions.

Open the package inside the downloaded disk image to start macOS Installer.

Open 67 Cleaner from Applications to reach the Home screen.

If macOS blocks the package or shows a security warning, stop and copy the exact message. Contact support with the macOS version and download address.

Once the app opens, run a Quick Scan or check what is included in Free, Trial and Premium.

NEED MORE HELP?
