

Can I use Trojan Killer in my language?

Gridinsoft Help Center

Yes-Trojan Killer supports multiple interface languages. Open Settings -> Language and switch anytime; this changes the UI only (protection quality is identical). If your language isn't listed and you'd like to help translate, let us know-volunteer translators receive a free key as thanks.

Available languages: English; Português Brasileiro (Brazilian Portuguese); Nederlands (Dutch); Français (French); Deutsch (German); Polski (Polish); ??????? (Russian); Slovenčina (Slovene); Español (Spanish); Türkçe (Turkish); ????????? (Ukrainian).
