

Download & Install Trojan Killer

Gridinsoft Help Center

Option A - Standard installation

- Download Get Trojan Killer from our official download link.
- Open the installer Double-click the downloaded file and approve the Windows prompt (UAC) to continue.
- Choose setup options Select the install location and (optionally) create a desktop shortcut, then click Install. Agree to the EULA
- You can also read the EULA on our website.
- Click Finish. You can auto-start Trojan Killer right after setup. On first run, let it update the threat database.

Option B - Use the Portable Edition (no installation)

Use this when the PC is restricted, heavily infected, or you prefer to run from a USB stick.

- Prepare on any clean PC Download Trojan Killer and place (or install) it onto a USB flash drive.
- Plug into the target PC Connect the USB and launch Trojan Killer directly from the USB-no installation needed.
- Update & scan Start Trojan Killer from the USB, update definitions if you're online, then run a scan and follow on-screen actions. (A restart may be required to finish removals.)

System requirements

Windows 11/10 (32/64-bit)

Legacy compatibility: Runs on Windows 8.1/8. Many shops and legacy PCs still need malware cleanup. Trojan Killer can run on Windows 7/Vista/XP too, with reduced features on those unsupported systems.

Why: Microsoft no longer supports 8.1/8 with security updates, so we keep them as "works if you need it," not primary targets.

Verify you downloaded the legitimate app (recommended)

- Official source: Always download from Gridinsoft domains.
- Digital signature: In Windows, right-click the file -> Properties -> Digital Signatures to confirm it's signed by Gridinsoft LLC.

Activate your subscription

If you already have a code or license, follow the activation guide after installation/first launch.

If the installer won't start

- Run as administrator: Right-click the installer -> Run as administrator.
- Temporarily pause other security software: Some products block third-party installers. Resume protection after install.
- Try Portable Edition: If downloads or installers are blocked, prepare the USB on a clean PC and launch it on the target machine.
