

How do I uninstall Gridinsoft Anti-Malware?

Gridinsoft Help Center

On Windows 10/11:

- Open Settings -> Apps -> Apps & features (Windows 11: Installed apps).
- Find Gridinsoft Anti-Malware, select Uninstall, and confirm.
- Approve the UAC prompt and follow the uninstaller. Restart if asked.

If you don't see it or the uninstall fails:

- Use Control Panel -> Programs and Features, select Gridinsoft Anti-Malware -> Uninstall.
- Or run the uninstaller directly: C:\Program Files\Gridinsoft Anti-Malware\unins000.exe.
- If you're moving the license to another PC, open the app first and deactivate the license, then uninstall.
- After uninstall, you can optionally delete leftover folders (e.g., %ProgramData%\Gridinsoft), but only if you don't need logs or quarantine.

If the problem persists, please contact our Support Team.
