

The activation limit is reached. What should I do?

Gridinsoft Help Center

This usually means your license is already in use on the allowed number of devices or the hardware changed after a reinstall. Please contact our Support Team and we'll free up an activation or move the license to your current PC.

To speed it up, include:

- Purchase email and license key
- Brief reason (new PC, Windows reinstalled, old device retired)

We'll verify ownership and reset the activations in line with your license terms (one corporate PC or two home PCs).
