[01 What you get with each edition](#)[02 Three reasons to choose Pro](#)[03 Which edition should I choose?](#)[04 Get Pro](#)

Trojan Scanner Free gives you useful checks without a subscription. Pro adds tools for potential spying risks, unfamiliar links and a more regular checking routine. Choose the edition that fits how you use your phone; your free scanning tools remain available when Pro ends.

01 What you get with each edition

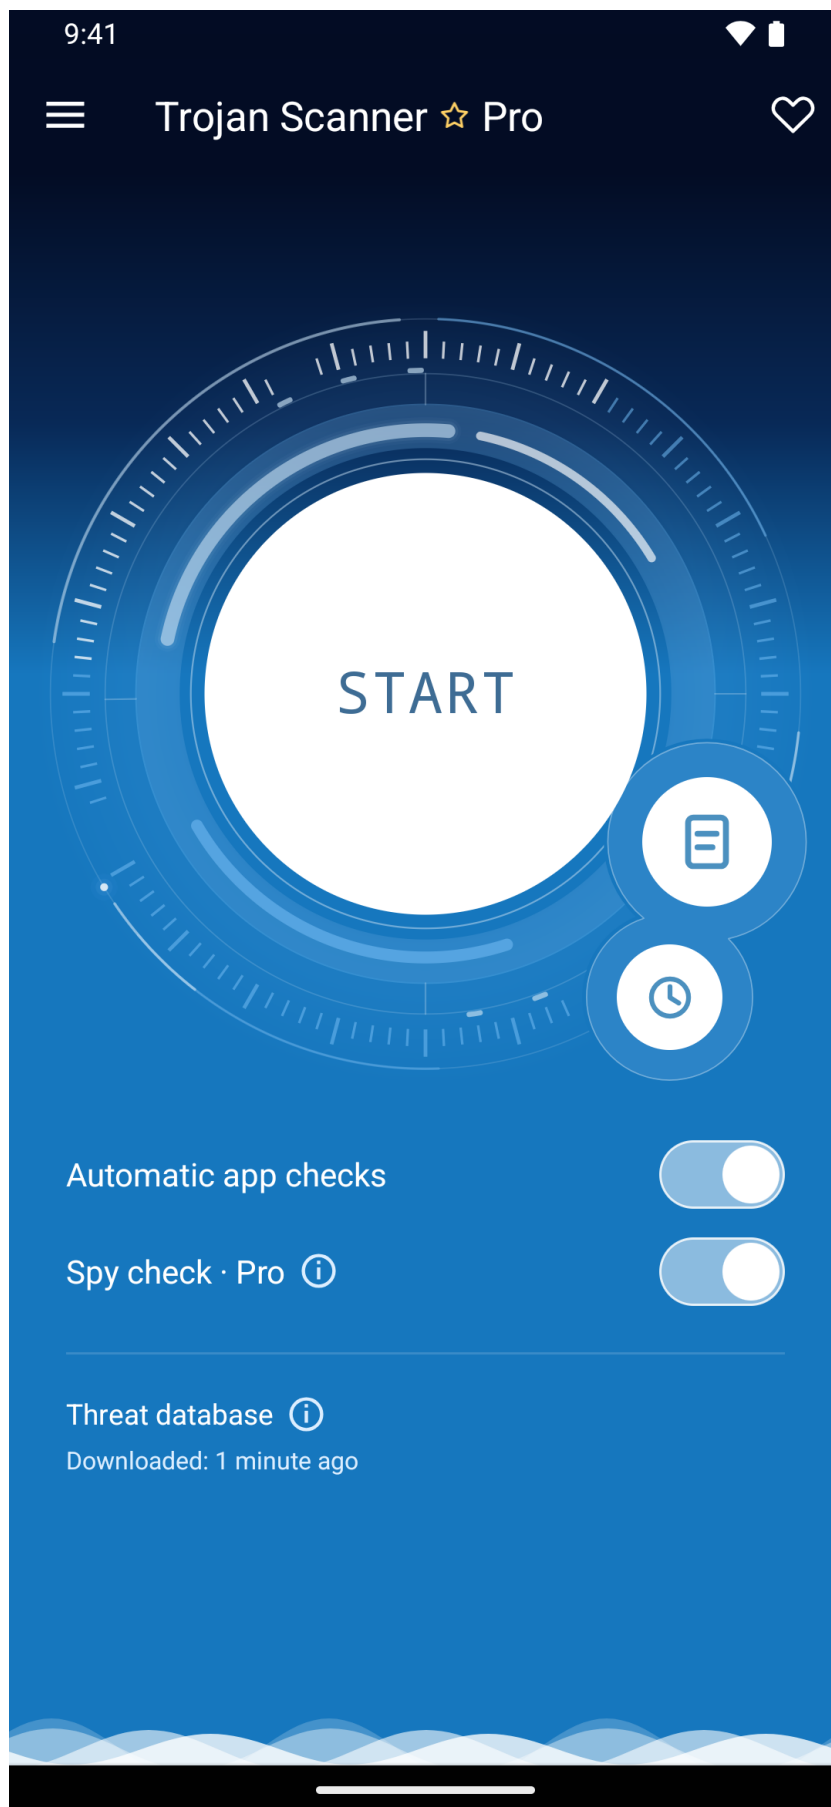

Feature	Free
Manual device scan	✓
Selected files and archives	✓
New and updated app checks	✓
Optional cloud checks*	✓*
Anti Spy	—
Shared or pasted link checks	—
Scheduled app scans	—
Automatic database updates	—
History and What changed	✓

✓ Included. Local checks do not require an account. * The optional [free cloud checks](#) require sign-in, internet access and your consent. File checks depend on available access; private storage inside other apps is not accessible.

02 Three reasons to choose Pro

- **Look for potential spying risks.** [Anti Spy](#) helps you review hidden apps with sensitive access and potentially risky capabilities in APKs. Enable Surveillance check in Pro settings to include this analysis.
- **Check before opening an unfamiliar link.** Share a delivery message, an unexpected offer or a sign-in link with Scanner. [Pro checks its domains](#) for known phishing, scam and malware infrastructure before you decide what to do.
- **Spend less time remembering routine checks.** [Schedule installed-app checks](#) every 24 hours or every 7 days, and arrange checks after database updates. Pro can also download

threat-database updates automatically. Android may delay background work.

The Pro home screen. Manual scans and automatic checks of new apps are also available in Free.

03 Which edition should I choose?

Choose Free if you prefer to start checks yourself and want automatic checks when apps are installed or updated. Choose Pro if you want Anti Spy, a convenient way to review suspicious links, and recurring scans and database updates.

Both editions show findings for you to review. A permission or surveillance warning is a potential risk, not proof of malware or spying. A completed result with no detections is not a guarantee of safety.

04 Get Pro

Open **Menu → Unlock Pro** to see the current annual one-device plan. The app and Google Play show the price and renewal terms for your account. Read [how to activate and manage Pro](#) before purchasing.

NEED MORE HELP?
