

Use your phone to clean a Windows PC: Cure My PC

Gridinsoft Help Center

Cure My PC turns your Android phone into a helper that brings a trusted Windows cleaner to a sick PC that can't download tools on its own.

When to use it

- The PC is slow, locked by malware, or can't open websites.
- You want a portable cleaner you can run from your phone or a USB stick.

What you need

- An Android phone with Trojan Scanner installed
- Internet on the phone
- A USB flash drive/microSD
- A few hundred MB of free space

Step-by-step

- Open Cure My PC In Trojan Scanner, open the side menu and tap Cure My PC.
- Continue Read the short intro and tap Cure My PC to start.
- Choose where to save, then download Pick a folder on your phone or attached USB/microSD and tap Download.
- Connect to the PC and run the cleaner Plug your USB stick into the PC. Open the saved folder and run TrojanKillerPortable.exe. Click Scan, then Remove anything found.

Quick tips

- Windows warning (SmartScreen)? Click More info -> Run anyway (publisher: Gridinsoft).
- No admin rights? Right-click the tool -> Run as administrator for best cleanup.
- No internet on the PC? The portable tool can scan offline; update later when online.
